

WORLDWIDE COMPETITIVENESS CLUSTER

CHAMPAGNE-ARDENNE PICARDIE

The objective of the **INDUSTRIES and AGRO-RESOURCES** Competitiveness Cluster is to get researchers, industrials, academics and farmers in the Champagne-Ardenne and Picardie Regions to work together on the non-food transformations of plant biomass.

Through the "**Université des Agro-Ressources**", the worldwide cluster wishes to highlight the work of Wallonia which promotes the French-Walloon know-how in the field of agro-resources.

An example of French-Walloon project: **TRANSVAL**. The **Interreg** project involves the University of Gembloux, the competitiveness clusters Industries & Agro-Ressources (F), and Wagralim (BE). It aims at facilitating new cross-border partnerships in the field of agro-resources.

A Walloon partner: **Agrobiopôle Wallon**, is an important centre in the fields of Agronomy and Biotechnologies, and a major actor in Wallonia. One of its main objectives is to promote, to value, and to develop the concept of biorefinery and the value of the non-food production in agro-resources. Agrobiopôle Wallon shares a stand with the IAR cluster at Innovact.

A step towards sustainable development,
around four main themes...

Bioenergies

Agromaterials

Biomolecules

Green Ingredients
